100 rumah rosak dibadai ribut

Sepang: Ribut yang merosakkan kira-kira 100 rumah di Zon Bandar Baru Salak Tinggi Utara kelmarin, disifatkan sebagai terburuk dan kali pertama berlaku di kawasan itu.

Pengerusi Jawatankuasa Pengurusan Bencana Daerah Sepang, Mohamad Zain A Hamid, berkata hujan lebat dan angin kencang turut menerbangkan bumbung sebahagian kediaman dalam kejadian kira-kira jam 5 petang itu, namun jumlah kerugian belum dapat dipastikan setakat semalam.

Beliau berkata, pihaknya membuka kaunter pendaftaran di balai raya kawasan terbabit pagi semalam, bagi mendapatkan data sebenar bertujuan menyalurkan Bantuan Wang Ehsan Kerajaan Selangor.

"Kami juga meminta penduduk membuat laporan polis dan mengambil gambar kerosakan terbabit sebelum mendaftar," katanya kepada pemberita selepas melawat kawasan perumahan Taman Seroja, di sini, semalam.

Mohamad Zain berkata, bumbung Sekolah Menengah Kebangsaan (SMK) Bandar Baru Salak Tinggi, Sekolah Kebangsaan (SK)

Pihak kami membuka kaunter pendaftaran di balai raya kawasan terbabit pagi semalam, bagi mendapatkan data sebenar bertujuan menyalurkan Bantuan Wang Ehsan Kerajaan Selangor.

 Pengerusi Jawatankuasa Pengurusan Bencana Daerah Sepang

Taman Seroja, SK Salak dan SK Lapangan Terbang Antarabangsa Kuala Lumpur (KLIA) turut rosak dalam insiden itu.

"Bagaimanapun, tiada penduduk ditempatkan di pusat pemindahan sementara, manakala kerja membersihkan pokok tumbang disambung, hari ini (semalam)," katanya.

Khemah sekatan jalan raya yang didirikan polis turut terjejas, antaranya di Jalan Bandar Baru Salak Tinggi/Nilai, Jalan Pekan Salak/Kota Seriemas, Jalan Salak/Jijan, Jalan Sepang/Labu, Tol Serenia dan Tol Putrajaya.

Ketua Polis Daerah Sepang, Asisten Komisioner Wan Kamarul Azran Wan Yusof, berkata pihaknya bersama Jawatankuasa Pengurusan Bencana Daerah Sepang sudah mengadakan operasi pembersihan dan mengalih khemah yang rosak di kawasan sekatan jalan raya yang terkesan akibat ribut berkenaan.

Muhammad Sajjad terus bersembunyi

SHAH ALAM: Misteri kehilangan usahawan kosmetik, Muhammad Sajjad Kamaruzzaman atau lebih dikenali sebagai Sajad terus menjadi tanda tanya apabila sehingga kini, dia gagal ditemukan.

Malah, menurut sumber, Jabatan Agama Islam Selangor (JAIS) sehingga kini juga belum memberikan sebarang surat kepada pihak berkuasa.

“Sehingga kini, tiada apa-apa surat daripada JAIS bagi membolehkan pihak berkuasa seperti polis untuk membantu mengesannya.”

“Polis boleh membantu mengesannya jika pihak yang

sepatutnya ingin kita melakukannya,” katanya kepada *Utusan Malaysia* di sini semalam.

Dalam pada itu, sumber berkata, Muhammad Sajjad terus mendiamkan diri dengan tidak memaklumkan apa-apa kepada sesiapa.

Jelas sumber, dia difahamkan Muhammad Sajjad juga tidak menghubungi ibu bapanya sejak waran tangkap terhadapnya dikeluarkan Mahkamah Tinggi Syariah Shah Alam.

“Saya juga difahamkan dia langsung tidak menghubungi peguamnya dan kali terakhir pada hari dia menyerahkan sijil cuti

sakit (MC) yang diperoleh daripada kerajaan selama dua hari,” ujarnya.

Baru-baru ini, JAIS telah memberikan arahan kepada penguatkuasanya bagi mengesan dan menahan Muhammad Sajjad untuk dibawa ke mahkamah.

Pemburuan terhadap Muhammad Sajjad, 36, susulan waran tangkap dikeluarkan terhadapnya minggu lalu kerana kegagalannya hadir ke Mahkamah Syariah.

Muhammad Sajjad menghilangkan diri tanpa khabar selepas memberikan MC kepada peguamnya dan tidak memaklumkan apa-apa.

RIBUT yang merosakkan kira-kira 100 rumah di BBST Zon Utara dan Zon Salak, kelmarin adalah kali pertama berlaku di kawasan itu.

Oleh Samadi Ahmad
 am@hmetro.com.my

Sepang

Ribut yang merosakkan kira-kira 100 rumah penduduk di Bandar Baru Salak Tinggi (BBST) Zon Utara dan Zon Salak di sini, kelmarin disifatkan amat buruk dan pertama kali berlaku di kawasan itu.

Pengerusi Jawatankuasa Pengurusan Bencana Daerah Sepang, Mohamad Zain A Hamid berkata, bencana bermula jam 4.30 petang kelmarin apabila hujan dan ribut menerbangkan bumbung rumah penduduk.

Kawasan perumahan BBST yang terjejas adalah Taman Seroja membabitkan 17 rumah, Taman Dahlia (19), Apartment Casa Dahlia (28), Taman Mawar Perdana selain Kampung Salak Tengah (7) dan Kampung Baru Pekan Salak sebanyak 20 rumah.

Turut mengalami kerosakan adalah Sekolah Kebangsaan (SK) Taman Seroja, SK Salak, SK KLIA dan Sekolah

Sepang dilanda ribut

Sejumlah 100 kediaman di BBST Zon Utara, Zon Salak alami kerosakan

Menengah Kebangsaan berkenaan bagi mendapati (SMK) Bandar Baru Salak kan data sebenar sebelum Tinggi.

Bantuan Wang Ehsan Kerajaan Selangor disalurkan untuk membaiki kerosakan kediaman. "Kami juga meminta penduduk membuat laporan dan mengambil gambar kerosakan sebelum membuat pendaftaran," ka-

tanya selepas mengadakan lawatan ke kawasan perumahan Taman Seroja di sini, semalam.

Turut hadir, Pengerusi Persatuan penduduk Taman Seroja, Hairul Azman Razali dan Ahli Majlis BBST Utara, Mohd Syahrul Amri Mat Sari.

"Kerosakan lain membatikan sekolah tadika pula akan dimajukan kepada Kementerian berkenaan untuk bantuan kerajaan pusat.

"Untuk bantuan lain, kami kini dalam proses mendapatkan bantuan daripada Pusat Zakat Negeri Selangor selepas menerima maklumat yang diperolehi," katanya.

Selain itu, kata beliau, pihaknya turut meminta bantuan agensi dan jabatan lain seperti bomba dan Jabatan Kerja Raya (JKR) serta skuad pantas Majlis Perbandaran Sepang bagi kerja pembersihan.

"Kerja pembersihan pokok tumbang, khemah rosak dan laluan di kawasan bencana bermula kelmarin sehingga pagi semalam," katanya.

'Bumbung tanggal satu persatu'

Sepang: "Air hujan melimpah masuk ke dalam rumah sebaik bumbung kediaman kami tertanggal satu persatu diterbangkan ke langit," kata suri rumah, Norhaslinda Abdul Hamid, 44.

Dalam kejadian jam 4.30 petang kelmarin, hujan disertai angin kencang itu menyebabkan kediamannya dan puluhan penduduk di Bandar Baru Salak Tinggi (BBST) Zon Utara dan Zon Salak di sini, rosak teruk.

Menurutnya, air hujan turut memasuki bilik anaknya dan membasahi perabot serta perkasas elektrik.

Katanya, keadaan cuaca yang gelap selain hujan tanpa henti sehingga lewat malam menyukarkan mereka untuk memindahkan barangan di dalam rumah.

"Kerosakan bumbung agak teruk. Kami sudah dapatkan khidmat tukang kayu untuk membaiki.

"Kami juga mendaftar de-

ngan Jawatankuasa Pengurusan Bencana Daerah Sepang untuk mendapatkan Bantuan Wang Ehsan Selangor bagi menampung kos baik pulih ini," katanya. Pesara kerajaan, Osman Mansor, 60, berkata kejadian ribut itu berlaku tanpa diduga dan disertai hujan lebat serta petir.

Menurutnya, dia yang berada di dalam surau selepas solat Asar terkejut apabila melihat bumbung kediaman penduduk diterbangkan ribut.

Sementara itu Menteri Pembangunan Wanita, Keluarga dan Masyarakat, Datuk Seri Rina Mohd Harun mengadakan lawatan ke kawasan itu, semalam.

Beliau yang juga Ketua Srikandi Parti Pribumi Bersatu Malaysia (Bersatu) Sepang berkata, pihaknya akan menyalurkan wang ihsan peribadi bagi membantu penduduk yang terjejas.

Sivasundaram serasi bersama Hamidin

Oleh MOHD FARIQ

PEMERHATI bola sepak tempatan sedikit terkejut apabila Datuk S. Sivasundaram mengesahkan pencalonan untuk merebut jawatan Timbalan Presiden Persatuan Bolasepak Malaysia (FAM).

Beliau yang berusia 69 tahun April nanti bersama Datuk Wira Mohd. Yusoff Mahadi bakal bersaing untuk jawatan berkenaan sekali gus menjadi 'orang kanan' kepada Presiden, Datuk Hamidin Mohd. Amin.

Walaupun menganggotai exco FAM sejak 2010 dan menjadi naib presiden dari 2017 hingga 2021, Sivasundaram lebih sinonim dengan bola sepak Selangor.

Dilantik menjadi bendahari FAS pada 1997, gandingan bersama Hamidin ibarat 'aur dengan tebing'. Ketika Sivasundaram mengawal bajet pengurusan dan perbelanjaan pasukan serta menjana pendapatan menerusi kutipan tiket, Hamidin tampil sebagai 'wajah' FAS.

Sivasundaram menjadi pemikir strategik, manakala Hamidin pula adalah pelaksananya.

Namun, apabila Hamidin memutuskan menerima tawaran Almarhum Sultan Haji Ahmad Shah untuk menjadi Setiausaha Agung FAM pada 2013, pentadbiran FAS berdepan cabaran berbeza.

Rosman Mohd. Ibrahim dilihat sebagai pengganti yang kurang sesuai dengan legasi Hamidin.

Tanpa Hamidin, pengurusan pasukan tidak sepakat dalam banyak hal.

Sekalipun Sivasundaram ke-

SIVASUNDARAM

kal selaku bendahari dengan memainkan peranan di sebalik tabir, namanya terpalit dengan kontroversi konflik di antara Menteri Besar dan pucuk pimpinan FAS.

Kegagalan FAS menswastakan pasukan dan permainan politik dalaman menyebabkan penyokong menuding jari kepada Rosman dan Sivasundaram.

Bagaimanapun, beberapa perancangan di balik tabir cetusan Sivasundaram dengan pengurus pasukan, Amirudin Shari yang kini menjadi Menteri Besar Selangor, pasukan Gergasi Merah menjulang Piala Malaysia dengan membenam Kedah 2-0 pada final 2015 untuk melengkapkan Misi 33.

Sivasundaram menyertai FAM pada 2010 dan diberi jawatan

Pengerusi Jawatankuasa Tiket dan Stadium berjaya menjalankan tugasnya dengan baik membolehkan kantung FAM terisi.

Memiliki perwatakan tegas tetapi gemar berjenaka, Sivasundaram dianggap sebagai individu yang tidak banyak karena, apa sahaja tugas diberikan pasti dilaksanakannya sebaik mungkin.

Hamidin juga menghormati Sivasundaram sebagai seorang yang berwawasan dengan idea di luar kotak, maka masa akan menentukan sama ada gandingan Hamidin-Sivasundaram ini mampu menterjemahkan sukses dari peringkat negeri ke pentas antarabangsa pula.

Akhbar	:	Kosmo
Tajuk Berita	:	Buff nadi utama Gergasi Merah
Muka Surat	:	47

Permata baharu Selangor FC

PIHAK pengurusan Selangor FC mampu menarik nafas lega apabila keputusan yang dibuat untuk mendapatkan pemain import, Oliver Buff dianggap berbaloi dan tepat setakat ini.

Bekas pemain FC Zurich dan Real Zaragoza itu tidak menunggu lama untuk membuktikan kemampuannya apabila meledak dua gol ketika membantu Selangor FC menewaskan cabaran Sri Pahang FC 3-1 di Stadium Majlis Bandaraya Petaling Jaya (MBPJ) kelmarin pada aksi pembukaan Liga Super.

Bukan sekadar sentuhan penyudah yang tajam, Buff juga dilihat menjadi penggerak utama skuad Gergasi Merah setiap kali mereka melancarkan serangan.

Pemain yang pernah menjulang trofi Piala Dunia Bawah 17 Tahun (U-17) bersama skuad Switzerland itu pada 2009 sebelum ini mendapat kritikan peminat ekoran aksi hambarnya dalam beberapa siri perlawanan persahabatan tetapi berjaya menebus kembali pada aksi tersebut.

Ketua jurulatih Selangor, Karsten Neitzel mengaku sangat gembira dengan persembahan dipamer Buff dan berharap prestasinya akan terus kekal.

- BERITA PENUH DI MUKA 47

Buff bakal menjadi sebutan peminat Selangor FC jika berjaya mengekalkan prestasi terbaiknya.

Buff nadi utama Gergasi Merah

Oleh MUHAMMAD HELMEE RAMLI

PEMAIN tengah Selangor FC, Oliver Buff melancarkan anjakan awal buat pasukan-pasukan Liga Super apabila meledak dua gol ketika membantu pasukan itu menang 3-1 ke atas Sri Pahang malam kelmarin.

Pada perlawanan yang berlangsung di Stadium Majlis Bandaraya Petaling Jaya (MBPJ) itu, Buff membuktikan pelaburan Selangor mendapatkan khidmatnya muslim ini bertalot.

Selain mengiringkan dua gol, pemenang Piala Dunia Bawah 17 Tahun (U-17) 2009 itu dilihat menjadi penggerak utama pasukan Gergasi Merah ketika melancarkan serangan.

Ketua Jurulatih Selangor, Karsten Neitzel turut mengakui keberanian yang ditampilkannya bekas pemain Real Zaragoza itu selain gembira dengan dua gol yang dijaringkan.

"Bagi saya, amat penting untuk semua penyokong melihat sendiri kemampuan Selangor musim ini yang menampilkan aksi lebih baik serta bermain sebagai satu pasukan.

"Secara jujur, Oli (Buff) bermain sangat baik pada penampilannya dalam Liga Super kerana berjaya jaringkan dua gol. Bagaimanapun, pemain-pemain lain turut berikan sumbangan cukup besar," kata pengendali dari Jerman itu.

Sebelum ini, penyokong penyokong Selangor kurang

Buff berjaya meledak dua gol ketika membantu Selangor FC mencatat kemenangan 3-1 ke atas Sri Pahang kelmarin.

gembira dengan prestasi yang ditampilkannya dalam beberapa aksi persahabatan, namun pemain Switzerland berjaya menebus kelesihan itu pada perlawanan kelmarin.

Sementara itu, Neitzel juga berharap ketua pasukan, Brendan Gan akan segera pulih daripada kecederaan dan kembali berada dalam kesebelasan utama menjelang aksi menentang Terengganu FC malam esok.

"Berhubung kecederaan yang dialami Brendan (Gan), saya harap dia boleh kembali ke dalam pasukan dan membantu kami pada perlawanan akan datang," ujarnya lagi.

PENYERANG Sri Pahang FC, Muhammad Baqluddin (kiri) bersaing dengan pemain Selangor FC, Wan Zack Haikal untuk mendapatkan bola pada aksi kelmarin.

Dooley enggan salahkan pemain Sri Pahang

Oleh **MUHAMMAD ZUHAILY BADLISHAH**

SEGALANYA serba tidak menjadi buat Sri Pahang FC yang terpaksa akur kalah 1-3 kepada pasukan pilihan, Selangor FC pada aksi pertama kaneh Liga Super musim ini di Stadium Majlis Bandaraya Petaling Jaya malam kelmarin.

Bagaimanapun, ketua jurulatih Sri Pahang, Thomas Dooley enggan menuding jari kepada barisan pemainnya yang dilihat tewas dalam setiap aspek kepada skuad Gergasi Merah walaupun berjaya meraih satu gol menerusi

sepakan percuma Nor Azam Abdul Azih.

"Kami bertemu salah satu pasukan terbaik dalam saingan liga yang mempunyai ramai pemain berkualiti selain kebanyakannya bersama skuad kebangsaan. Jadi, ia bukan sesuatu yang mudah untuk menewaskan Selangor.

"Kami cuba menyaingi mereka tetapi ia tidak berlaku. Saya tidak mahu beri alasan atau kerana pemain-pemain sudah berjuang dan berjaya menjaringkan satu gol.

"Kami mahu bermain bola sepak seperti ditunjukkan Selangor. Kami akan terus berusaha

dan memperbaiki setiap kelemahan untuk kembali bermain bola sepak sebenar kami," katanya.

Sementara itu, Dooley, 60, menegaskan, tonggak import Ukraine, Yevhen Bokhashvili memerlukan beberapa perlawanan lagi untuk kembali mendapat tahap permainan terbaiknya selepas terpaksa dikeluarkan pada awal babak kedua kelmarin.

Skuad Tok Gajah terpaksa akur pulang dengan tangan kosong selepas membenarkan Selangor meledak tiga gol menerusi dua jaringan Oliver Buff dan satu daripada Muhammad Shahrel Fikri Md. Fauzi.

Unisel buka peluang kaki pancing sertai cabaran memancing toman secara percuma

BESTARI JAYA - Universiti Selangor (Unisel) membuka peluang kepada kaki pancing untuk memancing ikan toman secara percuma di tasik universiti itu. Pengarah Komunikasi Korporat Unisel, Hasril Abu Hassan berkata, pihaknya kini dalam usaha mengeluarkan spesies berkenaan di tasik utama kampus

di Bestari Jaya dan memindahkannya ke sebuah tasik yang telah dikhaskan di universiti berkenaan.

"Kepada pemancing, anda dijemput datang memancing ikan toman di Unisel pada setiap Sabtu dan Ahad sehingga hujung April ini.

"Konsep memancing ialah

tangkap dan lepas. Ikan toman yang berjaya dipancing akan dilepaskan semula di The Tomanz, iaitu tasik yang dikhaskan untuk ikan ini," katanya di sini pada Ahad.

Hasril berkata, pemancing perlu membuat tempahan awal kerana hanya terhad kepada 30 orang sahaja pada setiap masa.

Maklumat lanjut dan tempahan slot memancing boleh diperolehi melalui Facebook The Tomanz.

"The Tomanz kini mempunyai lebih daripada 200 ekor ikan toman dan akan dibuka secara rasmi kepada pemancing pada Mei depan sempena sambutan ulang tahun ke-20 Unisel,"

katanya.

Hasril berkata, berkonsepkan pancingan rekreasi, sedikit caj bayaran dikenakan kepada pemancing.

"Unisel kini sedang menyiapkan beberapa kemudahan untuk pemancing seperti surau dan bilik rehat berhawa dingin," katanya.

Kadar kemajuan projek ECRL capai 20.83 peratus

Kadar kemajuan keseluruhan Projek Laluan Rel Pantai Timur (ECRL) yang dijangka siap 2026 telah mencapai 20.83 peratus setakat ini, kata Pengerusi Malaysia Rail Link Sdn Bhd (MRL) Mohd Zukri di.

Berikut berikutan angka itu menunjukkan kemajuan projek itu satu peratus lebih awal daripada jadual asal.

"Projek ini masih ada tempoh panjang dan ada beberapa isu belum selesai antaranya isu pengambilan tanah dan pembersihan tapak. Setakat ini kemajuan ECRL sudah mencapai 20.83 peratus.

"Kemajuannya cukup baik, namun tidak itu paling kritikal antaranya perolehan kelulusan daripada kerajaan negeri berhubung tiga kawasan A (Kota Bharu ke Dungun) B (Dungun ke Temerloh) dan C (Temerloh ke Port Klang), kita masih menunggu selakusan daripada Selangor.

"Selangor capai kelulusan maka keseluruhan projek ECRL akan dapat dilaksanakan (dengan segera) dan untuk memastikan tidak lari daripada perancangan kita, "katanya kepada pemberita selepas majlis tajuk projek Rambah Kelangka di pejabat Menteri (Ekonomi) Mustapa Mohamed.

Mengulas lanjut, Mohd Zukri yang juga Ketua Setiausaha Negara berkata bagi jayrannya kontraktor tempatan dalam projek berkenaan setakat ini, jumlahnya mencapai 12 peratus daripada 40 peratus kesatuan yang ditetapkan pihaknya.

Sertai cabaran memancing toman Unisel

Unisel memulakan satu cabaran memancing toman di kawasan Taman Sunway Perdana pada Sabtu (6) Mac ini.

A A'

BERTAS JAYA - Unisel Selangor (Unisel) membuka peluang kepada ahli peminat memancing ikan toman secara percuma di lokasi unisel itu.

Menurut Pegawai Komunikasi Korporat Unisel, Hani Hani, memancing ikan toman adalah merupakan aktiviti keseronokan di kalangan masyarakat di kawasan Unisel. Selain itu, memancing ikan toman juga merupakan aktiviti yang boleh meningkatkan kesedaran alam sekitar.

"Malah memancing, aktiviti memancing adalah memancing ikan toman di Unisel pada setiap Sabtu dan Ahad sehingga Hujung Acah ini.

"Meskipun memancing ikan toman dan ikan lain, ikan toman yang terbesar biasanya akan dibekalkan kepada The Terrace, Shah Alam yang dibekalkan oleh ikan toman Unisel pada Ahad.

Hani berkata, memancing yang memulakan pada pukul sembilan pagi dan berakhir pada pukul 12 tengah hari pada setiap minggu.

Maklumat lanjut dan tempahan tiket memancing boleh dipertah melalui Facebook The Terrace.

"Ikan toman kini mempunyai lebih daripada 2000 ekor ikan toman dan ia akan dibekalkan kepada peminat memancing pada 1000 orang sahaja semalam dalam Unisel pada 20 Unisel.

"Berkonsepkan peminat memancing, unisel telah dibekalkan kepada memancing. Unisel Unisel kini sedang memancing beberapa kemudahan untuk memancing seperti perahu dan alat memancing seperti rod, umpan dan sebagainya.

Menurut Hani, pihaknya kini sedang berusaha memulakan aktiviti memancing bagi tujuan mempromosikan peminat memancing.

Aerial river surveillance

Selangor in final stages of drone plan to identify polluters and monitor waterways in bid to stop future water disruptions

By VIJENTH NARAYAN

MILITARY-GRADE drones, a high-technology surveillance technology for rivers, is the Selangor government's next step to put an end to pollution that causes unorthodox water supply disruptions.

The devices are also capable of identifying the subjects who pollute rivers that are our main water sources.

Selangor Water Management Authority (SWA) is in the final stages of appointing a private company to manage the drones.

State infrastructure and public utilities, modernisation of agriculture and agro-based industry committee chairman Shih Mohd Haniff said.

Law had been negotiating with the company since November last year.

Surveillance is a proactive measure to give more pollution-free, hygienic water to river basins of Sungai Selangor, Sungai Langat and Sungai Klang.

"Law and the company are finalising the details of the terms and cost of operation."

"The drones have the ability to collect data and water samples even in inaccessible areas."

"There are two models that will be used for the operation."

"They are the M300, which is the surveillance model, and the M200, which is the sampling model."

▶ TURN TO PAGE 1

▶ FROM PAGE 1

"The drone is also capable of cross-river movement in the state and issuing early warning of pollution that will enable that coordination with Law's Positif Squad for on-site control measures," he explained.

The plan to get the drones was announced last year by Selangor ministers, environment, green technology and change and urbanisation committee chairman Lee Lay Swan. He had said then that the drones would cost about RM10 million.

Having assemblyman Chua Wei Kuan said the government should embrace technology, especially in helping to improve its operations to improve efficiency.

If all goes well, the state will be the first in the country to use such technology for such, and could set a precedent for other states to follow the suit the area along the rivers and river basins were too wide to be covered by personnel all the time, and technology could help reach areas faster than human staff.

"Drones will definitely be a great tool to help the environment take monitor activities."

"In some of our districts, there is Sungai Gong which has been the starting point of a few river pollution incidents that caused water supply disruption last year."

"There are many illegal activities along the riparian and the drones can help detect those too," he added.

Experts' take on initiative

Water quality and monitoring specialist Dr Zaki Khatun said drones would help in overall catchment and pollution monitoring as well as enforcement activities.

He said they would facilitate locating illegal dumpsites and encroachments, as well as detect illegal discharges and dumping.

"Drones are one of the tools that can be deployed by the authorities to help them when carrying out their work."

"However, I hope it does not stop there," he said.

Zaki said data gathered from the

'Data from drones can also ensure effective catchment management'

Drones can help detect illegal dumpsites and activities along riverbanks. - Filipco

Dr Khatun said polluters can always find ways to avoid detection, even by the drones.

Drones could be used for more effective catchment management. Sustainable river water quality and prevention of pollution were highly dependent on effective catchment management and protection, he elaborated, emphasising that sources of pollution needed to be managed from the planning stage.

"For example, sources of high-risk pollution should not be located upstream of water intakes."

"Sources of high pollution load should be assigned a limit relative to their carrying capacity, something not provided in the regulations now."

"From this aspect, perhaps the data gathered from the drones can also be used to determine areas with high pollution density and elevated risk."

"This information can then be used to mitigate such risks," he highlighted.

Global Environment Centre River Care programme manager Dr Khatun Khatun said although drones were good for monitoring inaccessible areas, polluters could find ways to avoid detection.

Drones need to be manned by pilots and would not be flying around the clock, he pointed out.

"The detection of pollution on the polluters in their sites of surveillance is not guaranteed."

"However, drones can complement real-time water monitoring systems effectively," he noted.

Dr Khatun said that ideally, the government should work towards implementing a mandatory real-time water monitoring system at the last effluent discharge point for all factories and strategic points along rivers.

This, he explained, would raise the alarm immediately if pollution was detected.

"The system has successfully prevented river pollution in many countries," he added.

Dr Zaki says enforcement to catch polluters should not stop at only using drones.

Klang council studies proposal for one-way road in Taman Eng Ann

By EDWARD RAJENDRA
 edward@thestar.com.my

KLANG Municipal Council (MPK) will look into converting part of Jalan Kasawari 5 in Taman Eng Ann into a one-way street at certain hours to ease traffic congestion.

The idea would be discussed at MPK's sub-committee level next week as shopkeepers complained that the morning market in Lorong Kasawari 4 was causing congestion, said MPK Engineering Department's traffic and public transport section engineer Mohd Azhar Kasban.

The morning market has 191 stalls occupying parking bays between two rows of shops along Lorong Kasawari 4.

"Besides the increase in traffic volume from 6am to 11am, we have market-goers who double-park or haphazardly park at road bends.

"One suggestion is to regulate traffic flow during specific hours and instal concrete barriers to discourage parking at road bends," said Azhar.

Only 140m of the 250m-long Jalan

Kasawari 5 will be converted to a one-way system, where motorists will be required to turn right onto Jalan Kasawari 4 to exit Jalan Kasawari 5.

Klang councillor Low Kwee Sia, whose duty zone includes Taman Eng Ann, said if approved, the plan would be implemented on a trial basis for three months.

"We expect to test out the proposal in the second week of April.

"It will be carried out daily, including weekends, as the morning market operates throughout the week," he said.

Low said the North Klang police traffic division and MPK engineers visited the site twice to discuss ideas on traffic control and safety.

"MPK's Licensing Department will coordinate with the shopkeepers to arrange for loading and unloading of goods to be done later in the afternoon when Jalan Kasawari 5 sees less traffic.

"We are also upgrading the back lane of the first row of single-storey shopplots as an alternative route for motorists to drive out of Jalan

Kasawari 5," he said.

He added that back lanes must not be used as makeshift kitchens and parking there was not allowed.

Newspaper and magazine seller M. Rajan, 48, said it was high time MPK introduced measures to ease traffic congestion and resolve parking problems in the area.

Klang Consumer Association president Devadass Anjan said a

proposal was made in 2005 to have the morning market relocated to a more conducive area but the idea did not work out.

"There needs to be a proper place like a complex to house the morning market traders and, in the late evenings, the pasar malam traders.

"We need a coordinated and conducive environment to sell food," he said.

Many nods for high-tech initiative to stop river polluters

By **VIJENTHI NAIR**
 vijenthi@thestar.com.my

THE people welcome Selangor Government's initiative to use drones to monitor rivers. They want an end to river pollution, which forces unscheduled closure of water treatment plants that results in widespread water cuts. Multiple disruptions last year led to economic losses and inconvenienced many in the Klang Valley. Businesses that are heavily dependent on water supply for their operations have lauded the project. Selangor and Kuala Lumpur Laundry Association president Tham Ah Wah said the drones could help catch the culprits red-handed and provide evidence during prosecution. "As long as the culprits are not caught and heavily punished, they will continue with their illegal activity," he added. Under the amended Lembaga Urus Air Selangor (Luas) Enactment 1999, those found guilty of polluting rivers can be jailed up to three years or fined RM1mil. Malaysia Budget and Business Hotel Association president Ermy Suraya Hussein said polluters had become very bold and there were too many incidents that warranted

Mohamad Halim hopes the authorities will use drones to catch the culprits upon receiving tip-offs.

Marinah says it is high time polluters are caught and punished.

Unscheduled water disruptions cause hardship to the people and businesses, like this scene in December 2019. — Filepic

improved enforcement. "Budget hotels do not have big water tanks and we rely heavily on direct water supply. "During unscheduled water cuts, some of our members have had to close operations," she added. Residents living near rivers and involved in river preservation programmes also support the initiative. AU2 Keramat Community Garden chairman Mohamad Halim

Mohamad Said said its members often spotted polluters dumping rubbish and other wastes into Sungai Klang. He said their community garden was on the Sungai Klang riverbank and many members had spotted lorries dumping waste into the river but the residents could not do much, other than take photographs to lodge a report with the authorities later. "Often, the cameras on our phones are unable to capture the

vehicle registration numbers, making it difficult for the authorities to catch the culprits. "We, the residents, can help by providing tip-offs and the authorities can use the drones to collect evidence and prosecute them later," he added. Desa Mentari Block 1 Kelab Sahabat Hijau committee member Marinah Minhad, whose residential area is next to Sungai Penchala, said the presence of drones would make people think

twice about dumping waste into the river. "Sungai Penchala runs between residential and industrial areas. A number of residents have the habit of throwing rubbish into the river. "I am not sure if the industries upstream are also contributing to the pollution. "We have conducted many awareness programmes but river pollution continues. It is high time that the polluters are caught and punished," she added.

Zuki: ECRL project 29% complete

JELI: The East Coast Rail Link (ECRL) project, which is expected to be completed in 2026, has reached a progress rate of 29% so far, says Malaysia Rail Link Sdn Bhd (MRL) chairman Tan Sri Mohd Zuki Ali.

Although the percentage indicated the project was ahead of schedule, it was still a long way to go, he said, adding that there were issues such as land acquisition and site clearance that needed to be resolved.

“The most critical issue includes the approval from state governments on section A (Kota Baru to Dungun), B (Dungun to Temerloh) and C (Temerloh to Port Klang) where we are still awaiting approval from the Selangor state government.

“If we get the approval, then the entire ECRL project will be able to be implemented (immediately) and to ensure that it does not fall behind schedule,” he told reporters after visiting the Armed Forces Family Housing project site here yesterday.

Also present was Minister in the Prime Minister’s Department (Economy) Datuk Seri Mustapa Mohamed. — Bernama

RM249,000 aid for poor students in 83 schools

SHAH Alam City Council (MBSA) donated a total of RM249,000 to 83 schools in Petaling Perdana, Petaling Utama, Klang and Gombak districts.

The Back-to-School programme was initiated to help needy families, especially those in the B40 group, who had been affected by the Covid-19 pandemic.

Each school will get RM3,000 in cash and vouchers for school necessities that will be distributed to 30 students.

Shah Alam mayor Datuk Haris Kasim said the students identified by the schools for the programme were from among the hardcore poor, special needs group and those badly affected by the pandemic.

"MBSA hopes these contributions will ease the burden of the B40 group, to buy items their children require when returning to school," he said during a ceremony held at Wisma MBSA.

The programme carried out under the "Leaving No One Behind" approach is in line with the government's Sustainable Development Goals to end poverty in the city.

AIR pollution, especially haze, may influence Covid-19 transmissions and can have adverse effects on patients recovering from the virus, experts said.

Professor Dr G. Jayakumar of Melaka Manipal Medical College's Community and Occupational Medicine said emerging research indicated that exposure to air pollution, especially nitrous oxide and fine particles in the air (PM2.5), might increase the susceptibility to infection and death from Covid-19.

Therefore, he said, the poor communities, homeless and migrant workers who resided in shanty homes, as well as the elderly with pre-existing medical conditions, exposed to air pollution required special attention.

"They are at higher risk of developing complications from Covid-19 infections. These groups will have to be prioritised for Covid-19 vaccination, with physical distancing re-emphasised," he told the *New Straits Times*.

Particulate matter 2.5, or PM2.5, refers to tiny particles or droplets in the air that are 2.5 microns or less in width that reduce visibility and cause the air to appear hazy when levels are elevated.

The Meteorological Department had earlier cautioned that the hot spell, which is expected to last until next month, could trigger haze, drought, forest fires, and reduction in dam water levels.

Up to 5pm on March 6, it said nine areas in the peninsula had been issued a yellow-level heatwave alert, which denotes a daily maximum temperature of 35°C to 37°C for at least three consecutive days.

The areas were Kuala Lumpur, Petaling Jaya, Sepang, Tampin, Alor Gajah, Central Melaka, Jasin, Tangkak, and Batu Pahat.

Sabah and Sarawak saw no heatwave, and the maximum daily temperatures in the two states and other states in the peninsula were less than 35°C.

Dr Jayakumar said during the hot weather, people, especially vulnerable groups like the elderly heading out to vaccination sites, should drink plenty of water even if they did not feel thirsty.

"They should schedule their trip carefully, wear loose, lightweight, light-coloured clothing.

"Heat can trigger exhaustion and heatstroke and can aggravate existing conditions, such as heart, respiratory, kidney or

mental diseases.

"Firefighters, bakery workers, farmers, construction workers, boiler room workers and policemen or army personnel on external duty under the sweltering sun are at high risk of experiencing heat stress or, in severe situations, succumbing to heatstrokes."

On concerns over vaccination efficacy and storage, he said the external weather was unlikely or had little influence on the storage and transportation of vaccines as they were kept in a controlled environment.

Professor Dr G. Jayakumar

Many types of vaccines, he said, should be stored and transported via a cold supply chain and public health officials had found ways to keep vaccines ultra-cold at extreme temperatures of -80°C and -70°C.

He said at the onset of the pandemic, there were hopes that hot temperatures could reduce the spread of the virus.

However, he said, a recent study involving 202 locations in eight countries showed that warmer weather alone was unlikely to reduce Covid-19 transmissions.

"The transmission of the virus from one person to the next depends almost entirely on human behaviour."

Universiti Selangor visiting professor of Environmental Health Dr Jamal Hisham Hashim said

Covid-19 and air pollution tend to exacerbate the health of those with pre-existing medical conditions, like hypertension, chronic respiratory and cardiovascular diseases.

These medical conditions, he said, tend to occur in the elderly, who were also equally at risk from both air pollution and Covid-19.

"A Harvard study found that people who live in areas with high levels of fine particulate pollution are eight per cent more likely to die from Covid-19."

He said the hot and dry weather would trigger forest fires, which lead to hazy conditions.

"PM2.5 in haze can penetrate deep into the alveolar region of the lungs. Pneumonia due to severe Covid-19 also attacks the same region of the lungs, the lower respiratory tract."

While studies showed that Covid-19 survives well in low temperatures and humid conditions, with a report noting that temperatures above 55°C for five minutes could inactivate the coronavirus, he said the current hot weather might affect virus survival outdoors, but not enough to inactivate or kill it.

With the Conditional Movement Control Order and Recovery MCO in effect, Jamal said people should limit their time outdoors, especially the elderly and those with chronic medical conditions.

"Stay hydrated and stay in the shade as much as possible.

"In hot weather, the difference in temperatures under direct sunlight and in the shade can be significant. Homeless people should be given temporary shelter and medical care if the hot weather is prolonged and worsens."

The Meteorological Department said Malaysia was in the final phase of the Northeast Monsoon season, which was expected to continue until the middle of the month.

Professor Dr Jamal Hisham Hashim

During this period, it said, rainfall distribution in some areas was low in the peninsula, particularly in the northern region.

However, the department did not expect unusually hot weather conditions to occur this year.

Low rainfall over a period of several weeks could cause the weather to become hotter, especially at night when there was no cloud, it added.

Up to 5pm yesterday, Rompin district in Pahang was the only area with an unhealthy air quality reading with an Air Pollutant Index (API) reading of 106, with 25 other areas recording moderate air quality.

API readings of between 0 and 50 denote good air quality; 51 and 100, moderate; 101 and 200, unhealthy; 201 and 300, very unhealthy; and over 300, hazardous.

The article features a photo of Mohd Zuki and other officials at a construction site. The text reports that the East Coast Rail Link (ECRL) project has reached a 21% completion rate. It also mentions that the project is expected to be completed in 2026 and that there are still some issues to be resolved before the approval can be granted. The website also displays various other news items, including a "3 BIG TITLES" section and a "VACCINE" section.

JELI, March 7 — The East Coast Rail Link (ECRL) project which is expected to be completed in 2026 has reached a prog rate of 29 per cent so far, said Malaysia Rail Link Sdn Bhd (MRL) chairman Tan Sri Mohd Zuki Ali.

Mohd Zuki said although the percentage indicated that the project was ahead of schedule, it was still a long way to go adding that there were several issues such as land acquisition and site clearance that needed to be solved.

"The most critical issue includes the approval from state governments on section A (Kota Bharu to Dungun), B (Dung Temerloh) and C (Temerloh to Port Klang) where we are still awaiting the approval from the Selangor state governm

"If we get the approval then the entire ECRL project will be able to be implemented (immediately) and to ensure that does not fall behind schedule," he told reporters after visiting the Armed Forces Family Housing (RKAT) project site h today.

Also present was Minister in the Prime Minister's Department (Economy) Datuk Seri Mustapa Mohamed.

On the participation of local contractors in the ECRL project, Mohd Zuki, who is also the Chief Secretary to the Government said it had so far reached 12 per cent of the 40 per cent target set by MRL adding that more local contr are expected to participate when the project's civil works fully opened. — Bernama

汉都亚再也市会 设特委会解决4花园水灾

(马六甲 7 日讯) 汉都亚再也市议会设立特别委员会，解决管辖区四个花园在过去五年饱受突发水灾的问题。

这四个花园分别是玛琳柏迈花园、再迪花园、默拉维斯花园及武吉波浪碧斯达里花园。

市议会主席拿督沙丹说，该特别委员会包括甲水利灌溉

局、甲公共工程局及相关地区的市议员，收集不同的技术、意见与经验，协助监督突发水灾的情况，并解决问题。

沙丹昨晚巡视上述四个花园的灾情后，向媒体，这样表示。

沙丹表示，上述四个花园在过去五年，每逢大雨就水灾。不过，昨天水灾的情况受控，没有设立疏散中心。

阿米鲁丁（中）表示，雪州政府会进行一系列活动，提倡州内子民登记疫苗接种计划，预计在3月第二周开跑。 -张真甄-

雪州国州议员下周接种疫苗

吉隆坡7日讯 | 雪州22名国会议员和56名州议员，将在来临的一周，通过「全国新冠疫苗接种计划」，接种第一剂疫苗！

雪州大臣拿督斯里阿米鲁丁表示，所有的人民代议士都被安排率先接种新冠疫苗，以便他们能在接下来的阶段，协助接种疫苗的分配工作。

他说，由于时间紧迫，所以雪州的国州议员在上周四，并没有跟雪州行政议员同批接种疫苗。无论如何，雪州国州议员将在下周，于大马卫生部鉴定的冠病疫苗接种中心和特定医院，接种疫苗，预计需耗时一周时间完成。

此外，阿米鲁丁也点出，基于雪州新冠肺炎疫苗接种计划的登记人数偏低，因此雪州政府将积极与各地方政府或村委会合作，举办活动以提倡及鼓励民众主动登记。

「有关活动最快将从下周开始推行，否则若依照现有登记进展，欲达标全国2700万人口（占80%人口）登记疫苗接种，恐怕要用上一年时间。」

另外，他表示，雪州第三波新冠疫情受控，单日确诊病例呈乐观局面。尽管今年1、2月份雪州单日新冠确诊达2、3000宗，可过去两周以来，确诊病例维持在三位数，均在单日400至800宗之间。

「但愿雪州子民能继续严守防疫标准作业程序，若雪州能持续下降确诊病例，那来临的6、7月，一切（生活步调）就有可能恢复原样。」

阿米鲁丁是于今午走访国际山庄州议席活动，来到第六站的安邦南天宫九皇爷庙移交拨款后，向媒体如是表示。阿米鲁丁除了宣布颁发各1000令吉给9间受惠庙宇及佛寺外，还赠送物资给100户贫困户家庭。

东铁工程完成近21%

日里7日讯 | 大马铁路衔接公司 (MRL) 总执行长丹斯里莫哈末祖基宣布, 预计在2026年竣工的东海岸铁路 (ECRL) 计划工程至今已完成20.83%, 进度比预期快1%。此工程的期限仍长, 以及有数项课题尚未解决, 包括征地及清理地段。

「即便有最关键的问题, 包括在A区 (哥打峇鲁至龙运)、B区 (龙运至淡马鲁) 及C区 (淡马鲁至巴生港口), 需

向州政府寻求批准, 但整体工程的进度相当好。无论如何, 我们仍在等待雪州政府的批准。」

「若获得批准, 东铁整体工程得以 (迅速) 执行, 确保没偏离制定的时间表。」

莫哈末祖基也是政府首席秘书, 他今日巡视武装部队家庭房屋 (RKAT) 计划工地后, 对媒体如是表示。在场者还包括掌管经济事务的首相署部长拿督斯里慕斯达法。
